

- PAINA IR KO, UAB is the company, successfully working in the wooden articles and glued plywood area for over 10 years. We are a contemporary, modern company of foreign capital, which launched its activities on 28 June 2000.
- We specialize in the area of making curved plywood components from birch, beech, oak veneer and HPL laminate. Our products are intended for offices, auditoriums, cinema halls, waiting rooms, school furniture manufacturers as well as custom furniture manufacturers.
- Our main shareholder is the Italian company Paina Legno SRL, working in plywood industry for 20 years, having transferred its experience and technologies to Paina ir Ko, UAB. So, our products reflect not only experience-based innovative technologies, but also Italian sense of style and elegance.

VALUES

Partnership ;speed and versatility , innovative solutions.

MISSION

We are a reliable, professional company which guarantees the best quality, efficiency and continuous growth, and has partners in all Europe ;

STRATEGY

We constantly follow the market trends and seek to become a leader among the plywood manufacturers in the Baltic region.

AIMS

- Constant and analytical customer needs analysis.
- Professional and continuously improving staff performance.
- Establishment of long-term relationship with the partners.

Great attention is devoted to the quality of production and management . In 2016 „PAINA IR KO „ implemented ISO 9001:2015 (quality management system) ; ISO 14001:2015 (environmental management system ; OHSAS 18001:2007 Health & Safety Management System)

The company's key priority is to satisfy the needs and wishes of even the most demanding customers. We achieve this goal thanks to hard-working, motivated staff and the latest equipment

SERVICES

According to customer drawing or original sample we produce wooden mold with aluminium coat.

We select the best materials from birch, beech, oak veneer and laminate of various colors.

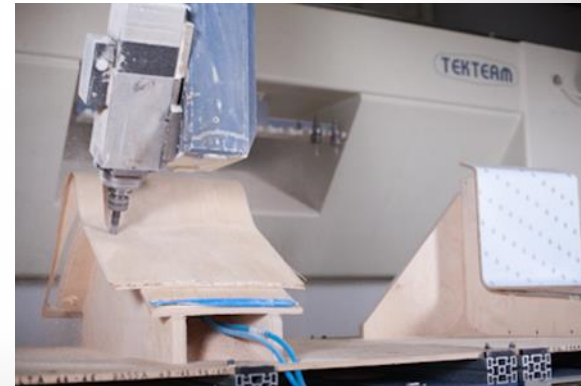

According to customer requirements we bend various type of plywood elements:

- with colorful HPL on the surface
- with A quality veneer for lacquering
- with veneer used for upholstery

CNC technical base: AUTO CAD, Rhinoceros, ALFA CAM and 6 CNC machines give us great opportunity to fulfill milling requirements:

Long-term grinding experience helps to achieve the best quality:

Additionally to standard services we provide the following:

- Give opportunity to keep the agreed number of semi-finished articles in our stock so the order can be completed in 2-3 days.
- Protective plastic on the surface of laminated details.
- Upholstery with foam and fabric.
- Lacquer ,stain and paraffine on the edges.
- Special packaging.
- In cooperation with partners we can offer production of the frames and assembly .
